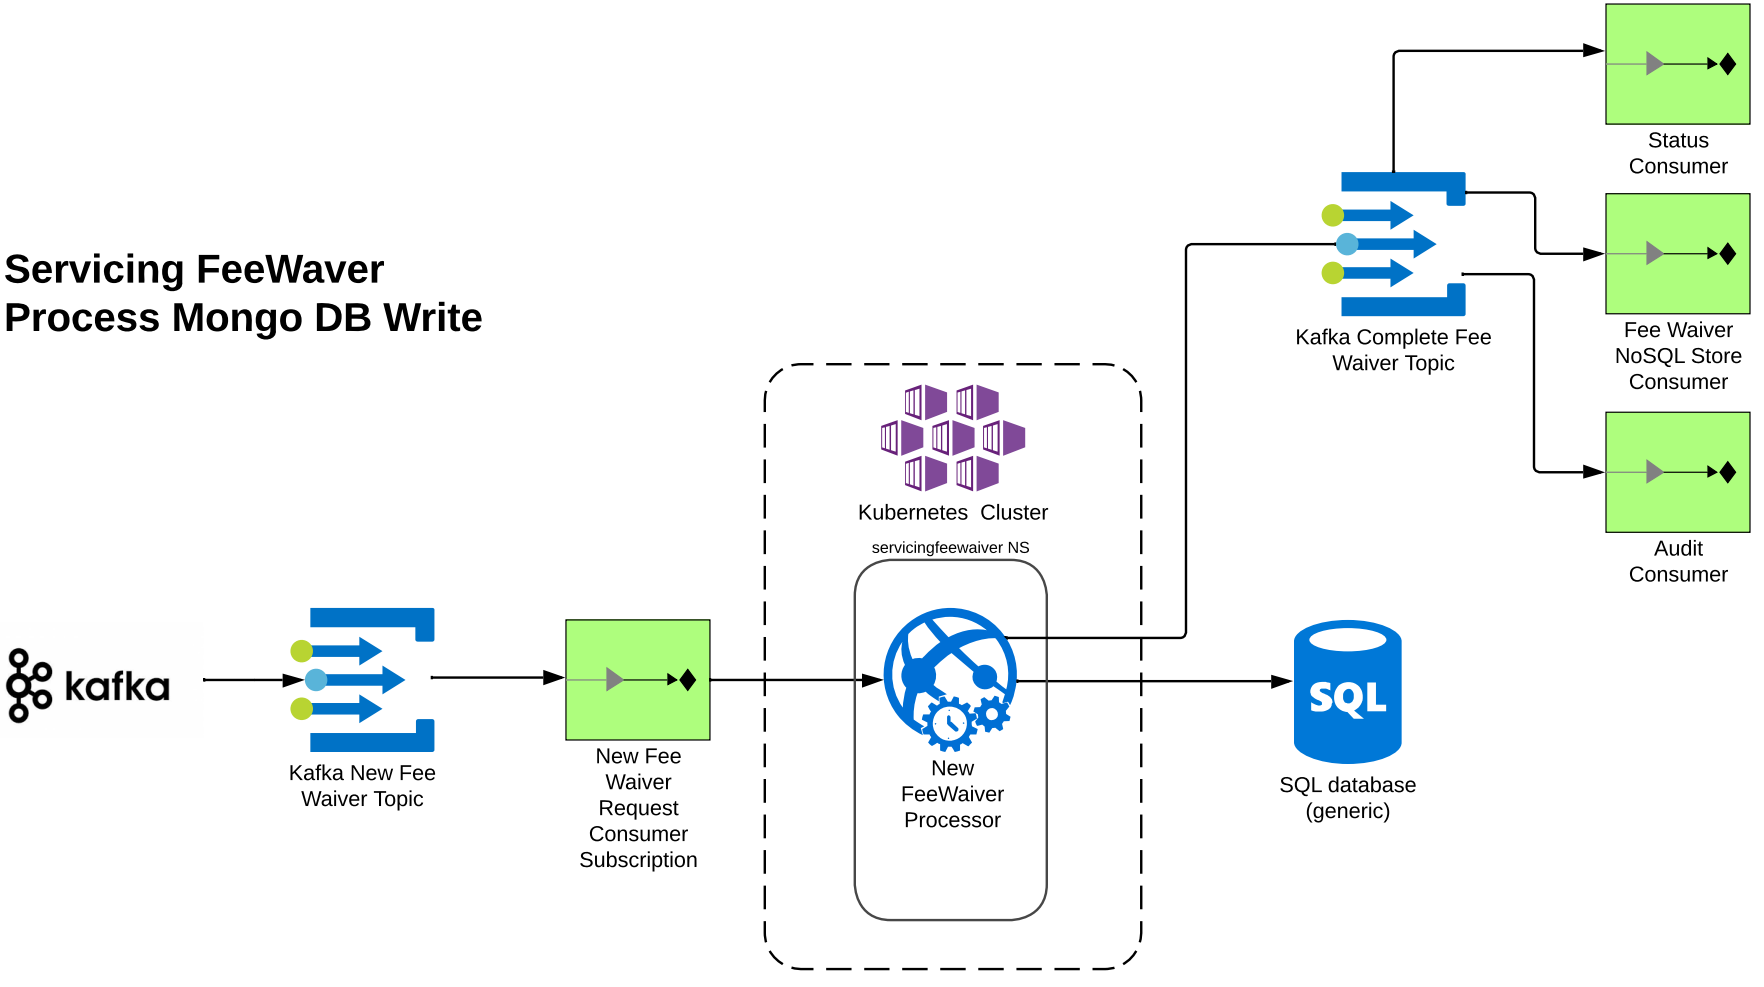
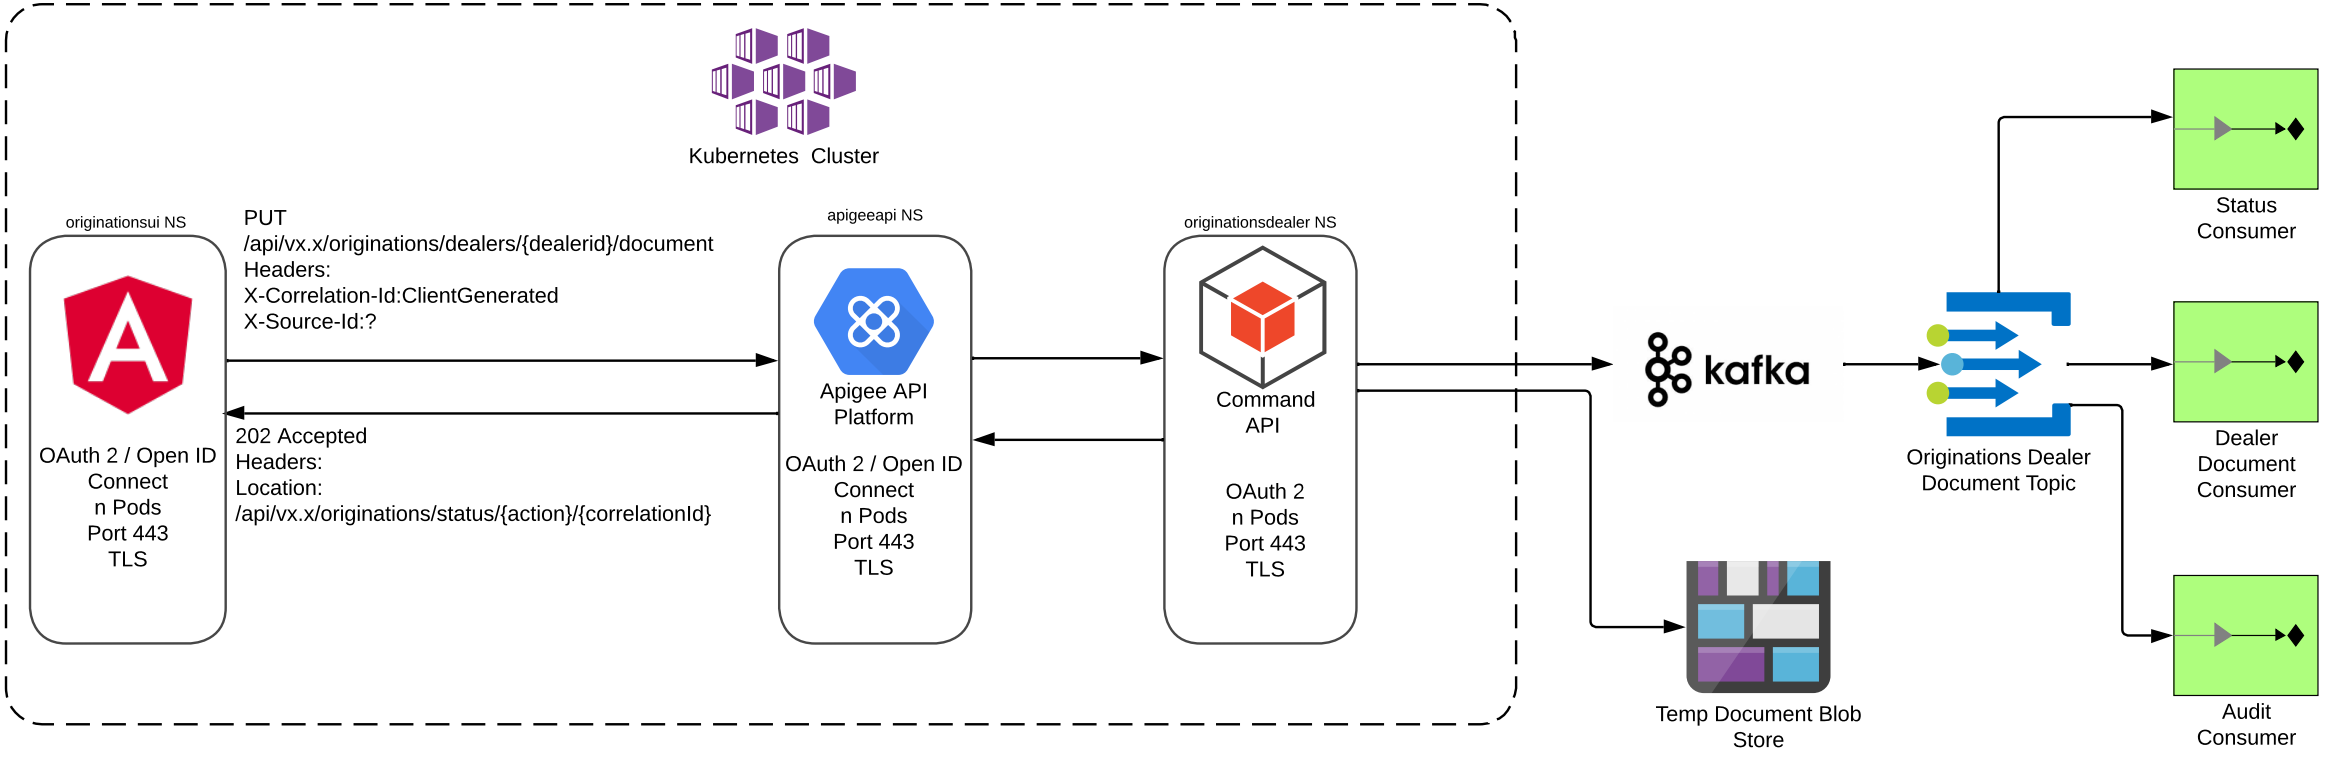
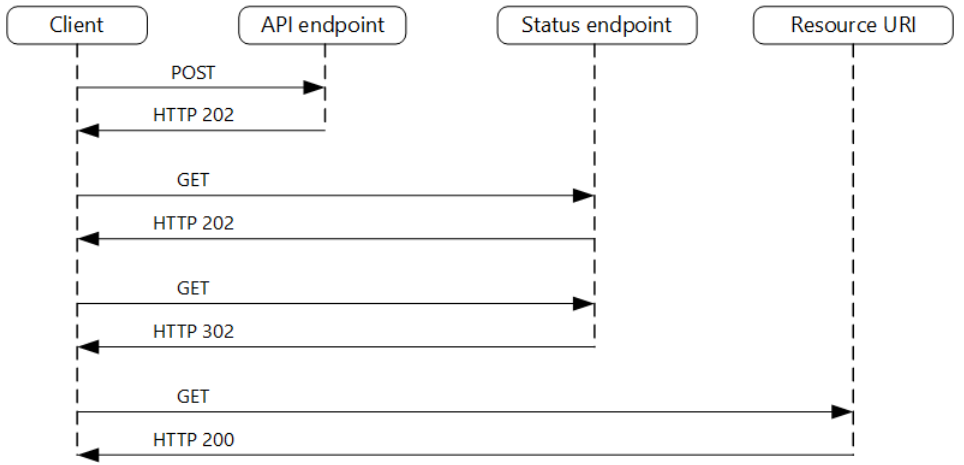
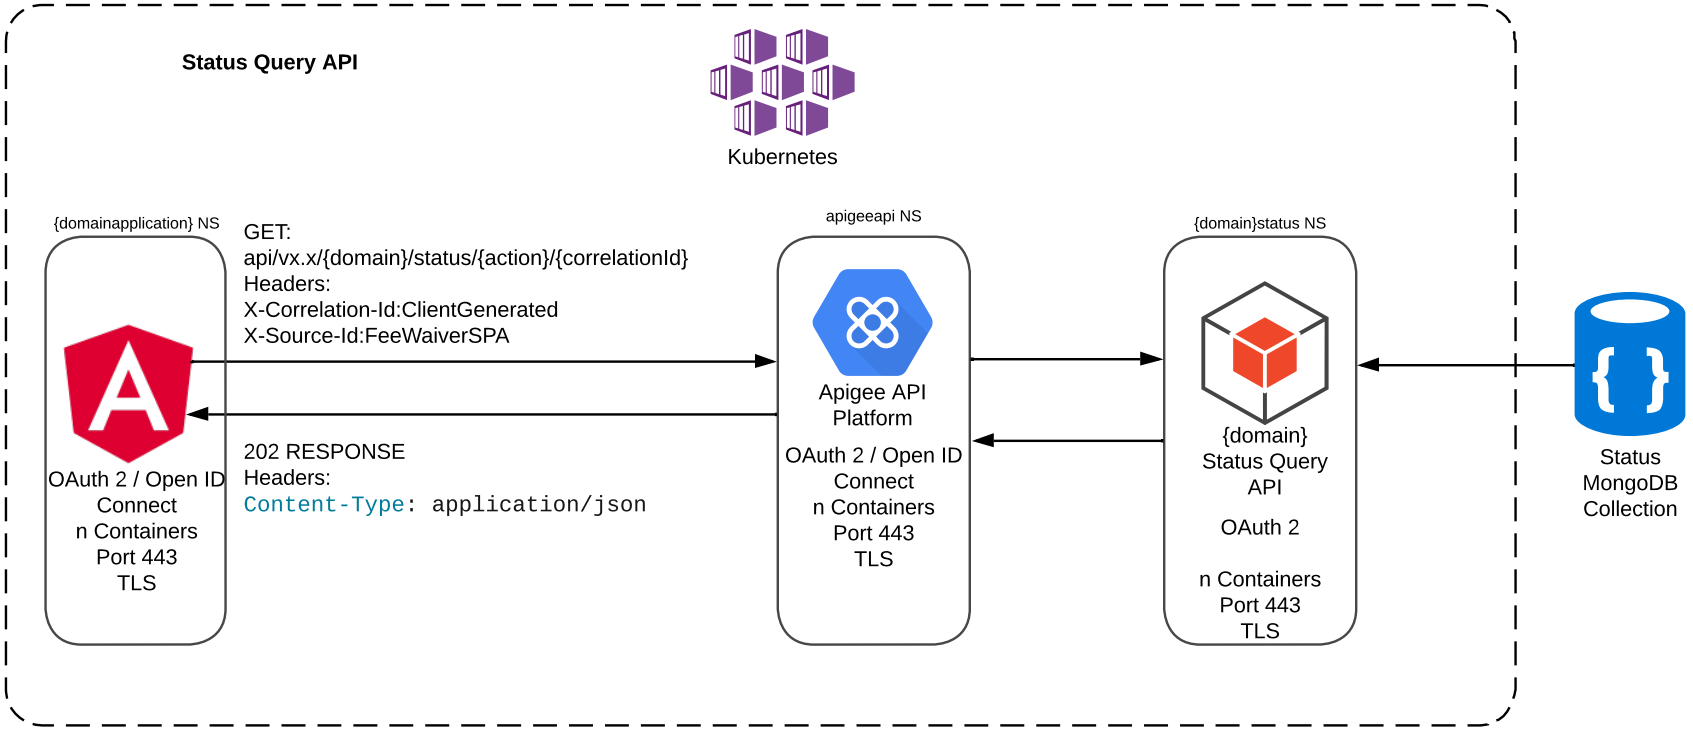
Servicing FeeWaver
Process Mongo DB Write



Originations Dealer Command API







202 RESPONSE
Headers:
`Content-Type: application/json`

```
Body:
{
  "status": "InProgress",
  "links": [{
    "rel": "cancel",
    "method": "delete",
    "href":
"/api/vx.x/{domain}/status/{action}/{correlationId}"
  }]
}
```

302 RESPONSE
Headers:
`Location:`
/api/vx.x/{domain}/{subdomain}/{subdomainid}/{action}/{actionresultid}

Links are optional, and could
contain 0 - n number of links in the collection

The response holds a location reference pointing to an endpoint that the client can poll to check for the result of the long running operation.
